03 / SOURCE QUALITY

What the sources establish

Evidence	State	Boundary
EUM web view	SYNTHETIC_FIXTURE_NOT_OFFICIAL	Online view only; obtain legal record separately
VWorld cadastral polygon	SYNTHETIC_CADASTRAL_GEOMETRY_NOT_VWORLD	Screening geometry; not survey authority
Area comparison	MATCH_WITHIN_SCREENING_TOLERANCE	Tolerance is a screening check, not title verification
Parcel collector	DESIGN_PARAMETERS_MISSING	Design parameter HOLD does not invalidate a matched parcel

Input fingerprints and section status are recorded in analysis_manifest.json. The report does not certify parcel title, zoning or statutory compliance.

07 / NEXT EVIDENCE

What needs verification

Legal parcel record

Obtain certified source if a legal claim is required

Zoning and statutory controls

Verify current project applicable law and effective date

Survey and boundary

Cross check cadastral screening polygon against measured CAD/survey

Context coverage

Verify building source coverage, date and unknown heights

Solar

Run or review a project bound study before environmental claims
